Abhiram Bhairavabhotla DevABHI2005

Hyderabad, Telangana - 500094, India

SUMMARY

Computer Science graduate with hands-on experience in Data Engineering and Data Analytics, specializing in building end-to-end ETL pipelines, integrating REST APIs, and transforming raw data into actionable business insights. Proficient in Python, SQL, Pandas, PostgreSQL, Power BI, Streamlit and Docker, with practical experience in multi-source data integration, analytical data modeling, and dashboard development. Combines strong technical foundations with a data-driven problem-solving approach to build scalable, reliable, and business-focused solutions.

EDUCATION

- **K L University** *2022 - 2026*
  Bachelor of Technology in Computer Science Engineering Guntur, India
  - CGPA: 9.2/10
- **Gowtham Junior College** *2020 - 2022*
  Intermediate Education Hyderabad, India
  - Grade: 79%

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C
- **Data Engineering:** ETL Pipelines, REST APIs, Pandas, NumPy, SQLAlchemy, Data Modelling, Data Warehousing
- **Databases:** PostgreSQL, MySQL, SQLite
- **Analytics & Visualization:** Power BI, Tableau, Streamlit, Excel, Matplotlib, Seaborn
- **Tools & Platforms:** Git, GitHub, Docker, Docker Compose, VS Code, Jupyter Notebook
- **Web Development:** React.js, Node.js, Django

EXPERIENCE

- **Data Engineering Intern**
  Azentrix Digital Services Jun 2026 – Jul 2026
  - Designed and developed modular ETL pipelines using Python, REST APIs, Pandas, and SQLAlchemy for multi-source data ingestion, transformation, validation, and loading.
  - Built the World Insights Lakehouse by integrating World Bank Population API data with World Happiness Report 2024, implementing data cleaning, schema reconciliation, and analytical data modeling.
  - Built the World Insights Lakehouse by integrating World Bank Population API data with World Happiness Report 2024, implementing data cleaning, schema reconciliation, and analytical data modeling.

PROJECTS

- **World Insights Lakehouse – Multi-Source Data Engineering Platform**
  Tools: Python, REST APIs, Pandas, SQLAlchemy, SQLite, Parquet, Streamlit, Docker
  - Designed and developed a modular ETL pipeline integrating World Bank Population API data with World Happiness Report 2024 for multi-source data processing.
  - Implemented data ingestion, transformation, validation, schema reconciliation, and analytical data modeling using Pandas and SQLAlchemy.
  - Developed an interactive Streamlit dashboard featuring country-level KPIs, automated insights, data-quality monitoring, and analytical visualizations.
  - Containerized the application using Docker and Docker Compose, enabling reproducible deployment across environments.
- **Customer Shopping Behavior Analysis**
  Tools: Python, Pandas, PostgreSQL, Power BI, SQL, Excel
  - Performed end-to-end data cleaning, feature engineering, and exploratory data analysis on 3,900+ customer transactions using Python and Pandas.
  - Designed and executed 10+ SQL queries in PostgreSQL to generate business KPIs including revenue trends, customer retention, repeat purchases, and top-selling products.
  - Developed an interactive Power BI dashboard with KPI cards, customer segmentation, and sales analytics, uncovering actionable insights into customer purchasing behavior.

EXTRACURRICULAR & CERTIFICATIONS

- **AWS Certified Cloud Practitioner** *April 2024*
- **Deloitte Australia Data Analytics Job Simulation on Forage** *July 2025*
